Blackened Blue

19:00 - 19:45

How're you doing? I'm Blackened Blue, and I've flown into town to make a scene! I've been doing this metal music schtick for a number of years, but recently managed to really dip my hooves into the live scene, and I've been honored to play at numerous conventions around the UK, Germany, The Netherlands, Italy and even the US. If you like your music loud, fast and melodic, then you'll wanna stick around for my set. Get your drinks in the air, Rock City!

Anneli's roles in My Little Pony include:

Koa

Performing for the first time across the pond from the States, Koa aims to bring you a set you'll never forget... because all of the songs will stay stuck in your head forever and ever. >:3 She's known for her quirky, varied brand of electronic pop music, as well as for contributing her writing, production, and voice to an ever-growing number of bronny projects, which has earned her the title of "collab queen" in the community.
